I can imagine.
I can love.
I can sing.
I can do anything!
We will not have the capacity to solve intractable social problems unless we have a citizenry that is capable of understanding multiple perspectives and acting on them.

“This baby is crying because her mom is gone.”
“Try not to get mad at a baby because they might learn to be mean when they grow up”
They are chasing me I told them to stop.

“They are chasing me I told them to stop.”
“I felt proud when I fed my mom when she came back from Coxwell Hospital.”
"I was proud when my grandma got her hip operation because she fast her fers."
“When my friend is scared of the slide, I will help him.”
Empathy is the basis of finding our shared humanity

“Chinese brutality in Tibet.” “Learn to live in peace.”
“Roots of Empathy can teach the world about people having feelings and people have them.”
- Grade 1 Student
“A time when I was bullied when a boy back in my country said a very bad word and I felt really bad, unhappy.”
I felt proud when I help my dad stop crying when my papa die.

"I help my dad stop crying when my papa die."
“I felt sad when my cousin died.”
Support of Community

Empathic Child Rearing
Empathic Child Caring
Empathic Teaching
Empathic Community Interaction
